

LED Strip Lights

High Power LED Strip Light | 120 LED | 4200K | 24V | 21w

Specifications

Operating Voltage	24v DC
Wattage per metre (max)	21w
LED Density	120
Cut Points	6mm
Colour Temperature	4200K
CRI	>83
Lumens	2500 lumens
SDMC	
Expected Hours To 70% Brightness (L70)	
Approvals	IEC61347-2-13, IEC55015

Cut Every LED For More Accurate Fitting

When you want the benefit of a high quality, reliable tape and need a very high power output then ProStrip120-HP2A is the right choice. As this is a high power strip it is **NOT** suitable for use on non metallic surfaces as it needs adequate thermal management to provide long term reliability. 3 Year warranty when installed correctly.

Can be cut between every LED - that's every 8.66mm - meaning dark areas can be reduced to an absolute minimum.

The triple thickness, narrow format PCB is only 6mm wide but because of this it is only suitable for relatively short run lengths - max 3 metres recommended as voltage drop will be experienced beyond this.

Order Code : PS120-42-HP2
