

## HaloLED Colour Changing

# Power Supply with Integrated HaloLED Interface. 24v. 75w

### Specifications

Wattage	75w Max
Current	Max 3.12A combined across all 4 channels
Output Voltage	24 V
Inrush current	65amp
PF (Power Factor)	>0.5
IP Rating	IP20
Input Voltage Range	100-240VAC
Dimensions	179*64*30mm
Tc (max surface temp of unit)	40c
Max recommended load	60w

## A Combined 75w Power Supply and Interface

Suitable for use with any Maxilux 24v LED Strip - single colour, adjustable white or RGBW.

Fully compatible with any of the HaloLED controls, it makes installation and control of LED Strip systems easier, quicker and neater as the LED Strip is simply wired directly into the PowerSmart unit with no additional controller required. It can then be paired with any of the controls in the HaloLED range including wall switches and remote controls.

### Control:

It's easy to set up and pair to other items in the HaloLED range - just press 1 button on the PowerSmart, and then one press on the chosen controller and they are ready to work together. PowerSmart can be linked to multiple controls so you could have a standard remote as well as a wall mounted switch if required.

These units are fully dimmable when used with any HaloLED control.
