Simple Control - Create 4 Scenes to provide atmosphere when you want it.

A superb and simple to use 4 scene wall switch to use with HaloLED interfaces - no wiring required as it is powered by a 3v lithium cell providing many months of use under normal conditions. Simply create up to 4 scenes using one of the HaloLED programming option (remote control or Smartphone APP & Applink) and then they are ready for instant recall then using the wall switch in everyday use.

Flexible - compatible with all types of LED Strip.

If you change the scene setting then the switch is automatically updated - no need to pair it again. This switch operates with any type of HaloLED product - this includes all LED Strip - single colour, ATMOSPHERE and ATMOSPHERE Colour as well as Lamps.

Easy - wire free so can be mounted anywhere.

It fits a standard wall box so fitting is simple and easy - the central part can be removed and used as a portable remote if required.
